Career Objective

Motivated BS Computer Science student seeking a C# / .NET Developer Internship. Eager to leverage strong foundational knowledge of Object-Oriented Programming (OOP), Data Structures, and Relational Databases to contribute to real-world software development. A disciplined self-starter currently transitioning academic Java and C++ foundations into building robust backend applications using C# and the .NET ecosystem.

Technical Skills

- **Programming Languages:** C# (Primary Focus), Java, C++, SQL, PHP, HTML5 / CSS3, JavaScript
- **Frameworks & Technologies:** .NET Core / ASP.NET (Learning), Laravel (Foundational)
- **Databases & Querying:** Microsoft SQL Server, MySQL, Oracle SQL, Relational Database Design (RDBMS)
- **Tools & IDEs:** Visual Studio, VS Code, Git, GitHub, MS Office
- **Core Methodologies:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Architecture, Debugging

Academic Projects & Self-Learning

C# / .NET Personal Initiative (In Progress)

Self-Guided Study

Patient & Student Record Management Console App

- Developing a lightweight, console-based management application in **C#** to practicalize core object-oriented principles (inheritance, encapsulation, and interfaces).
- Utilizing **Visual Studio** development tools and integrated debuggers to optimize application runtime and write robust exception-handling routines.
- Designing local data storage schemas to seamlessly manage student and patient records.

Object-Oriented Library Management System

University Semester Project

Developer (Java)

- Designed and implemented a desktop-based library system using core OOP concepts (Inheritance, Polymorphism, Encapsulation, and Abstraction) in Java.
- Engineered modular, reusable classes to process transaction workflows, search algorithms, and member registration.
- *Note for C# Recruiters:* System built with Java, demonstrating a strong architectural foundation directly transferable to C# and .NET frameworks.

Relational Database Design & Querying

University Coursework

Database Designer

- Designed and structured comprehensive Entity-Relationship Diagrams (ERDs) and normalized relational database schemas.
- Wrote complex, optimized SQL queries, multi-table joins, subqueries, and database constraints in **MySQL** and **Oracle** to manage and retrieve data efficiently.

Education

BS Computer Science

Sept 2023 – Present

National Skills University – Islamabad, Pakistan

Relevant Coursework: Programming Fundamentals, OOP, DSA, Database Systems, Web Technologies, Operating Systems.

Intermediate (ICS - Computer Science)

2021 – 2023

BISE Rawalpindi – Rawalpindi, Pakistan

Matric (Science Group)

2019 – 2021

BISE Rawalpindi – Rawalpindi, Pakistan

Achievements & Soft Skills

- **Self-Driven Learner:** Managed a full-time university academic schedule while maintaining a disciplined, independent regimen to master C# and backend technologies.
- **Analytical Problem Solver:** Excelled in algorithmic problem-solving, scoring top marks in Data Structures and OOP modules.
- **Collaborative Team Player:** Actively contributed to university team projects, taking ownership of database design and application logic.
